Water-Related Ecosystem Disruption

Water-related ecosystem services are the most commonly assessed source of nature-related financial risk across the initiatives reviewed in the Compendium

SECTORS MOST COMMONLY ASSESSED

AGRICULTURE

REAL ESTATE

UTILITIES

MANUFACTURING

FORESTRY

HOW AUTHORITIES ARE RESPONDING

1. Identify

Nature dependencies
and impacts

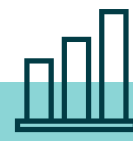

2. Assess

Sectoral and
financial exposure

3. Analyse

Data, indicators
and scenarios

4. Monitor

Financial
vulnerabilities

5. Act

Engagement and
development

KEY TAKEAWAYS

Nature-related risks are increasingly relevant for financial stability

Water-related risks are emerging as a critical area of analysis

Authorities are moving beyond awareness towards implementation

International cooperation and knowledge sharing remain essential
